

# Bridging the Visible with the Invisible

## Community Constellation Workshop

SYSTEMIC FAMILY CONSTELLATION is a unique approach that starts with you and any issue. Problems that are difficult to overcome are often rooted in trauma passed down from our parents, grandparents, our ancestral lineage.

Ancestral suffering can emerge and may manifest in your life as pain, illness, addiction, personal & relational difficulties. Problems that have not been easily remedied are often the after-effects of inherited trauma.

In this 3-dimensional group process, we enter into connection with our ancestors through sacred fields, opening a space of awareness in three dimensions of consciousness: personal, inherited and spiritual. We see that which has been hidden and resolutions appear, shifting generations of suffering.

The Constellation experience is deeply transformative, powerful and beneficial in a lasting way. The work deepens and strengthens over time for the client, the representatives and for those observing.

*"I am not alone. I am part of something greater. I am connected to my source through my ancestors."  
~Caroline Myss*

Carol brings a practiced and loving heart to her work. As a 'catalytic agent' she engages fully and facilitates results. She has trained with many Masters in the healing arts, wisdom traditions and in the fields of Energy medicine. She offers her work through public workshops, private sessions, and via Skype/telephone appointments.
